

ANTI-FALL DOCK LEVELER

Easy Cleaning / Color Customization Available

PRODUCT BRIEF

Hydraulic Dock Leveler with Anti-Fall Protection is an upgraded heavy-duty loading solution designed for enhanced safety during forklift operations. Equipped with an automatic Anti-Fall Safety Lock, the platform can immediately stop descending if a hydraulic failure or sudden truck movement occurs, effectively preventing forklift drop accidents.

TECHNICAL PARAMETERS

ITEM	SPECIFICATION
Platform Material	Q235 / 6-8MM Anti-slip Checkered Steel Plate
Hydraulic System	Main & Lip Cylinder / Safety Valve
Main Beams	Heavy-duty Reinforced Channel Beam
Anti-Fall Protection	Prevents Forklift Falling / Platform Sudden Drop
Advantages	Superior Safety for Forklift Operations
Optional Features	Hot-dip Galvanized / Extended Lip Size / Weather Seal
Safety Valve	Built-in Emergency Fall-prevention Valve
